Composite inception and creation date: 10/01/07. ¹The 3-Year annualized ex-post standard deviation is calculated using monthly gross-of-fee returns to measure the average deviations of returns from its mean. ²Dispersion is not calculated for years in which the composite contains five portfolios or less. Dispersion is calculated as the equal weighted standard deviation of gross-of-fee returns for those portfolios held in the composite during the entire period. The benchmark for this composite is the Russell 3000 Index. Past performance is not indicative of future results.

The Fort Washington Focused Equity strategy is an all-cap concentrated, value oriented strategy that invests in businesses with strong barriers to entry that have the capability of generating excess returns on capital. The strategy looks to take advantage of irrational human behavior by buying securities that have been mispriced by the market. We will invest in companies that have limited absolute downside and large margin of safety on the upside. The objective of the Focused Equity strategy is to outperform the Russell 3000 Index over a full market cycle. All fee-paying, fully discretionary portfolios managed in the Focused Equity style, with a minimum of \$1 million under our management, are included in this composite. Effective 01/22/14, the Focused Equity strategy fee schedule is as follows: 0.75% on the first \$25 million, 0.70% on the next \$25 million, and 0.65% on additional amounts over \$50 million. The benchmark for this composite is the Russell 3000 Index. Frank Russell Company (FRC) is the source and owner of the Russell Index data contained or reflected in this material and all trademarks and copyrights related thereto. The presentation may contain confidential information pertaining to FRC and unauthorized use, disclosure, copying, dissemination, or redistribution is strictly prohibited. This is a Fort Washington Investment Advisors, Inc. presentation of the Russell Index data. Frank Russell Company is not responsible for the formatting or configuration of this material or for any inaccuracy in Fort Washington's presentation thereof. Portfolios in this composite include cash, cash equivalents, investment securities, interest, and dividends. The composite may invest in ADRs, which the Russell 3000 Index does not use. Cash is maintained, within each separately managed account segment, in accordance with our asset allocation ratio. The U.S. dollar is the base currency. The specific securities identified and described do not represent all of the securities purchased, sold, or recommended. Returns are presented gross and net of management fees and include the reinvestment of all income. Gross returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. Net of fee performance was calculated using the actual management fees charged. Individual portfolio returns are calculated on a daily valuation basis. Past performance is not indicative of future results. Fort Washington Investment Advisors, Inc. (Fort Washington), a wholly owned subsidiary of The Western and Southern Life Insurance Company, is a registered investment advisor and provides discretionary money management to a broad range of investors, including both institutional and individual investors. Assets under management include all portfolios managed by Fort Washington and exclude assets under management by and marketed as its Private Equity business unit. RISK DISCLOSURES

Fort Washington's Focused Equity strategy invests in equities, which are subject to market volatility and loss. The strategy invests in stocks of large-cap companies which may be unable to respond quickly to new competitive challenges. The strategy invests in stocks of small- and mid-cap companies, which may be subject to more erratic market movements than stocks of larger, more established companies. The strategy may focus its investments in specific sectors and therefore is subject to the risk that adverse circumstances will have greater impact on the fund than on the fund that does not do so. The strategy invests in emerging markets securities, which are more likely to experience turmoil or rapid changes in market or economic conditions than developed countries. The strategy is non-diversified, which means that it may invest a greater percentage of its assets in the securities of a limited number of issuers and may be subject to greater risks.
