FORT WASHINGTON ULTRA SHORT DURATION - 3Q2024

GENERAL INFORMATION

- Inception Date: 01/01/1995 Strategy Assets: \$852 million Style: Ultra Short Duration
- Benchmark: ICE BofA 3-month Treasury Bill Index

VEHICLE AVAILABILITY

- Mutual Fund
- ► ETF
- Separately Managed Account

STRATEGY OVERVIEW

- Invests in higher-quality (Investment Grade), high cash flow bonds with emphasis on complexity premium
- Buy and hold approach with an emphasis on structured securities
- Seeks to keep duration less than a year to reduce risk

PHILOSOPHY

We believe

- In capturing complexity premium versus taking credit risk
- High cash flow and low spread duration are critical to managing volatility
- Certainty and short tenor of cash flow facilitates buy and hold strategy
- Structured securities offer best risk and return profile
- Specialization is required in increasingly complex markets

ABOUT FORT WASHINGTON

- Founded in 1990; \$86.3 billion in current total assets under management¹
- Organizational hallmarks include: stability of teams, consistency of process, competitive performance, deep resources, and alignment of interests

Composite inception and creation date: 01/01/1995. 'The 3-Year annualized ex-post standard deviation is calculated using monthly gross-of-fee returns to measure the average deviations of returns from its mean. ²Dispersion is not calculated for years in which the composite contains five portfolios or less. Dispersion is calculated as the equal weighted standard deviation of quarterly gross-of-fee returns for those portfolios held in the composite during the full measurement period. Past performance is not indicative of future results. The benchmark for this composite is the ICE BofA 3-Month US Treasury Bill Index. The ICE BofA 3-Month US treasury Bill Index measures the performance of short-term U.S. Treasury Bill set with a minimus of short-term investments and to employ an active sector rotation process identifying relative value within the short-term marketplace. Typical securities utilized include government bonds, corporate bonds, commercial paper, municipal bonds, and asset-backed bonds. Portfolio characteristics include average maximum duration of ne year, maximum duration per security of 5 years with all securities rated investment grade at time of purchase. All fee-paying, fully discretionary portfolios, managed in the Ultra Short Duration style with a minimum of \$10 million under our management are included in this composite. Effective 01/22/2014, the Ultra Short Duration strategy fee schedule is 0.20% on the first \$25 million and 0.15% on additional amounts over \$25 million. Portfolios in this composite include cash, equivalents, investment securities, interest, and dividends. Cash is maintained, within each separately managed effective portfolio duration will normally be one year or less. Returns are presented gross and net of management term and short term, investment grade det boligations, and its average effective portfolio duration will normally be one year or l

RISK DISCLOSURE

The Ultra Short Duration strategy invests in fixed-income securities which can experience reduced liquidity during certain market events, lose their value as interest rates rise and are subject to credit risk which is the risk of deterioration in the financial condition of an issuer and/or general economic conditions that can cause the issuer to not make timely payments of principal and interest also causing the securities to decline in value and an investor can lose principal. The strategy invests in mortgage-backed securities and asset-backed securities which are subject to the risks of prepayment, defaults, changing interest rates and at times, the financial condition of the issuer. The strategy invests in repurchase agreements which are considered loans by the strategy and may suffer a loss of principal and interest in the event of counterparty defaults. The strategy invests in Collateralized Loan Obligations (CLOs) that have risks that largely depend on the type of underlying collateral and risks may include illiquidity, limited active market, the possibility that distributions from collateral securities will be insufficient to make interest or other payments, the potential for a decline in the quality of the collateral, and can bear the risk of default by the loans.
